THE LOOK AND FEEL *of real wood*

NewTechWood uses select, recycled, high-density plastics, combined with recycled wood products, to create a composite wood substitute that drops your energy footprint to zero. NewTechWood is made from 95% recycled materials.

When you want the look of real wood, but you don't want the headaches of maintaining that beautiful façade, NewTechWood solves the problem.

NewTechWood with **Naturale** lasts longer, requires less maintenance, and it puts recycled materials to good use creating the natural look of wood without all the work.

- Wood is expensive and requires on-going, costly maintenance.
- The family deck has to be stained and water-proofed with toxic chemicals.
- The wooden siding needs an expensive paint job every few years.
- Wooden fencing requires constant repair, and time-consuming paint jobs to keep up appearances.
- Real wood accents add to the cost of any home improvement or new construction.
- You have less time to enjoy your family and your home because your exterior wood always needs something.
- The planet suffers as more wood is harvested to meet the ever-growing demand for natural-looking wood.

NEWTECHWOOD

the Smart Green Choice

All NewTechWood products are produced using 95% recycled materials including plastic bottles, reclaimed wood fibers, and other products that would normally end up in a landfill.

NewTechWood undertakes annual, third-party audits to assure compliance with environmental, health, and safety regulations and guidelines – a demonstration of our commitment to a greener alternative to wood building products that deplete the planet's resources.

NewTechWood shrinks your home's carbon footprint by using recycled materials constructed to be recycled again in the future. NewTechWood conserves home energy use.

Elegant
HOME SIDING
That last

Our home siding looks like natural wood, without the worries of real wood exposed to the elements. NewTechWood cladding installs quickly using our exclusive clip system that creates a lasting seal between planks.

Our installation system enables your home to "breathe" as air circulates between siding and joists, keeping your home high, dry, and energy efficient.

Why settle for aluminum or vinyl siding that looks fake, when you can have the same ease of installation and durability that stands up to any weather conditions with the natural look of wood.

New Product
SHOU SUGI BAN

NewTechWood innovates once again by introducing a brand new exterior siding solution, the highly realistic reproduction of charred Japanese cedar, commonly known as Shou Sugi Ban.

Although its existence is not recent, the use of Shou Sugi Ban as an exterior finishing has undergone rapid growth in recent years and is a hot trend among architects and designers all over Canada. Award-winning product, our Shou Sugi Ban received the Grand Winner prize in the Grands Prix du Design 2023.

A beautiful and durable solution for flawless design through the decades!
